R.R. 1, Box 206
Hamilton, Mo. 64644**

The breeders listed in this directory are dedicated to the improvement of the cattle industry and especially the great Shorthorn breed of cattle. These breeders have breeding stock available or will help find what you need.

Why Shorthorns?

With all the new exotic breeds being introduced today, there is a lot of confusion as to what breed to go with. Shorthorns are the oldest time-tested breed in this country. Shorthorns have proven the test in ease of calving, gentle disposition, milking ability, and their easy fleshing. They are very popular for cross-breeding and improved fertility. At the recent Western Beef Expo., Sterling, Colo., a group of Shorthorns was named the reserve champion in the Profitability Sweepstakes based on gaining ability, feed efficiency, and carcass yield. It is interesting to note that the exotic, crossbred group ranked highest for gaining ability, but ranked last in feed efficiency.

Polled Shorthorns Top Missouri Test Sale

Polled Shorthorns topped the 18th Missouri All-Breed Performance Tested Bull Sale, November 1, Columbia, Mo. The Polled Shorthorn bulls "out-averaged" the sale average by \$455. Below are the breed averages for the sale:

| | |
|------------------|---------|
| Polled Shorthorn | \$1,492 |
| Simmental | \$1,218 |
| Polled Hereford | \$1,117 |
| Hereford | \$1,035 |
| Limousin | \$1,000 |
| Angus | \$932 |
| Charolais | \$907 |

In 1974, Missouri ranked third in total registrations which gives Missouri cattlemen a good supply of breeding stock to select from.

PINE HILL PRESENTS

TPS Coronet Catalyst 65th X

by TPS Coronet Catalyst 20th X. He was purchased in the 1974 Polled Congress at one of the top prices. He had a 205 day weight of 675 pounds and a 365 day weight of 1055 pounds. His sire weighed 2450 pounds and his dam 1710 pounds.
